

## SUBJECT INDEX

## VOLUME 14

- AIDS  
  global impact, 327
- Anaerobic protozoa  
  drug targets, 150  
  mechanisms of resistance, 150
- Antimicrobial resistance  
  molecular detection, 836
- Antiseptics and disinfectants  
  action, 227  
  activity, 227  
  resistance, 227
- Antiviral action  
  interferons, 778
- Bacteria  
  *Helicobacter*, 59  
    rare and fastidious  
    related to endocarditis, 177
- Bioterrorism  
  implications for the clinical microbiologist, 364
- $\beta$ -Lactamase  
  extended spectrum  
    characterization, 933  
    detection, 933  
    epidemiology, 933
- Borna disease virus  
  human disease, 513
- Candidiasis  
  oral  
    experimental in animal models, 384
- Cerebral malaria  
  pathogenesis  
    recent experimental data and possible applications for humans, 810
- Chemokine signals  
  host-pathogen interactions, 821
- Diagnosis  
  periodontal disease  
    specific infection, 704  
  viruses  
    human calciviruses, 15, 446  
    noncultivable gastroenteritis, 15, 446
- Disease  
  human  
    Borna disease virus, 513  
  periodontal  
    diagnosis and treatment, 704  
  Ross River virus, 909  
  viral  
    nosocomial spread, 528  
  Whipple's disease and "*Tropheryma whipplei*," 561
- Disinfectants (and antiseptics)  
  action, 227  
  activity, 227  
  resistance, 227
- Endocarditis  
  due to rare and fastidious bacteria, 177
- Epidemiology  
  extended-spectrum  $\beta$ -lactamase, 933  
  foamy virus, 165  
  microbial  
    role of genomic typing, 547
- Extended-spectrum  $\beta$ -lactamase  
  characterization, 933  
  detection, 933  
  epidemiology, 933  
  Evolutionary genetics  
    role of genomic typing, 547
- Genomic typing  
  evolutionary genetics, 547  
  microbial epidemiology, 547  
  taxonomy, 547
- Giardia lamblia*  
  biology, 447  
  Giardiasis, 114
- Helicobacter*  
  diverse species, 59  
  emergence of diverse species, 59  
  related to enterohepatic diseases, 59  
  related to gastric diseases, 59
- Hepatitis A  
  new, 38, 642  
  old, 38, 642
- High-performance liquid chromatography  
  mycolic acid analysis  
    identification of *Mycobacterium* species, 703
- Historical perspective  
  foamy virus  
    epidemiology, 165  
    infection, 165
- Hookworm  
  infection  
    immune responses, 727
- Immune activation  
  contribution to pathogenesis and transmission of human immunodeficiency virus type 1, 753
- Immune responses  
  hookworm infection, 727  
  mucosal  
    vaccination strategies, 430, 641
- Immunity  
  to protozoan parasites, 476
- Immunization  
  active  
    in the United States (developments over the past decade), 872
- Infection  
  bacterial  
    chronic obstructive pulmonary disease, 336  
  foamy virus, 165  
  hookworm  
    immune responses, 727  
  periodontal disease  
    diagnosis, 704  
    treatment, 704  
  Ross River virus, 909
- Infectious agent  
  TT virus, 98
- Infectious disease issues  
  xenotransplantation, 1
- Interferons  
  antiviral action, 778
- Leishmaniasis  
  vaccine development  
    current status, 229
- Leptospirosis, 296
- Listeria*  
  molecular virulence determinants, 584  
  pathogenesis, 584
- Malaria  
  cerebral  
    recent experimental data and possible applications for humans, 810  
  current status, 208  
  potential for control, 208
- Mechanisms of resistance  
  anaerobic protozoa, 150
- Microbiology  
  wound  
    associated approaches to wound management, 244
- Molecular detection  
  antimicrobial resistance, 836
- Molecular machinations  
  chemokine signals in host-pathogen interactions, 821
- Mucosal immune responses  
  vaccination strategies, 430, 641
- Mycobacterium* species  
  identification  
    mycolic acid analysis by high-performance liquid chromatography, 689
- Mycobacterium avium* subsp. *paratuberculosis*  
  veterinary medicine, 489
- Pandemic threat  
  avian influenza A viruses, 129
- Parasites  
  protozoan  
    immunity to, 476  
    sex-associated hormones, 476
- Pathogenesis  
  cerebral malaria, 810  
  enterohepatic diseases, 59  
  gastric diseases, 59  
  *Helicobacter* species, 59  
  host-pathogen interactions  
    chemokine signals, 821
- Periodontal disease  
  specific, albeit chronic, infection  
    diagnosis and treatment, 704
- Poxvirus infections  
  chemotherapy, 382
- Protozoa  
  anaerobic  
    drug targets, 150  
    mechanisms of resistance, 150
- Schistosomiasis  
  People's Republic of China, 270
- Sex-associated hormones  
  related to immunity to protozoan parasites, 476
- Susceptibility testing  
  antifungal  
    practical aspects and current challenges, 643
- Taxonomy  
  role of genomic typing, 547
- Transmission  
  Ross River virus, 872

## SUBJECT INDEX

## VOLUME 14
